EDUCATION

Pace University

B.S in Computer Science (Completed: May 2025)

EXPERIENCE

Kikbax (Early-stage startup)

Ossining, New York

Software Engineer

June 2025 - Present

- ❖ Developing an app that links existing high-end private clients with staffed drivers, establishing the foundation for a future public rollout into the \$200 billion ride-share market
- ❖ Built scalable backend API handling 100+ concurrent connections using Express.js, Prisma ORM, and PostgreSQL with optimized queries reducing database load by 35%
- ❖ Set up monorepo structure with pnpm workspaces managing 4 applications (mobile app, 2 web portals, backend API) reducing dependency conflicts by 35%
- ❖ Implemented GitHub Actions CI pipeline for linting, type checking, and database migration verification on every PR

Temps Are Us, Inc.

Medway, Massachusetts

Full Stack Software Developer

June 2024 - Present

- ❖ Led a company-wide digital transformation for a high six-figure organization, creating a modern app and website designed to resolve critical staffing shortages in the dental industry
- ❖ Engineered payment & billing infrastructure handling Stripe invoice lifecycle, reducing manual finance work by 80% through automated invoice generation and webhook reconciliation—enabled zero-day payment processing for 40+ temp professionals
- ❖ Built customer features, such as a full-cycle timesheet management system that enabled digital signatures and automatic PDF invoice generation, streamlining payment workflows for dental offices

Weichert Realtors

Larchmont, New York

Licensed Real Estate Agent

April 2022 – June 2024

- ❖ Sold and supported residential real estate transactions totaling several million dollars, ensuring seamless closings and consistently high client satisfaction
- ❖ Translated complex market data and property valuations into actionable advice for clients, guiding purchasing and listing decisions and improving client engagement by 30%
- ❖ Created automated follow-up campaigns in kvCORE for over 1,000 prospects, increasing response rates by 20%

Inland Deicing Services

West Harrison, NY

Supervisor

September 2022 - February 2023

- ❖ Directed real-time operations for an 8-person crew in a high-stakes aviation environment, managing resource allocation and enforcing strict safety protocols to ensure 100% compliance with FAA and airline standards

PROJECTS

Choate AI | Duckweed Segmentation Model

- ❖ Fine-tuned Meta's Segment Anything Model (SAM) to identify duckweed in drone images of local ponds, integrating results with environmental sensor data to support pond remediation efforts through pattern recognition
- ❖ Presented research findings on data integration and model performance to stakeholders and an academic audience of 20+ peers, detailing the project's technical architecture and environmental impact

Elby | Automated Property Logging iOS App for STRs | [Link](#)

- ❖ Deployed and presented to external investors a full-stack mobile application to the Apple App Store, simplifying IRS compliance for short-term rental owners and reducing manual workload by 50% through automated reporting
- ❖ Implemented real-time geofencing and location tracking to automate the logging of property visits, improving data accuracy by 30% over manual methods

TECHNICAL SKILLS

- ❖ Programming Languages: Python, JavaScript, TypeScript, Java, C++, Bash
- ❖ Frameworks & Libraries: React, React Native, Node.js, Express.js, TanStack Query, Tailwind CSS, Spring Boot
- ❖ Databases & Backend: PostgreSQL, Supabase, MongoDB, Web APIs (REST), Prisma ORM, Redis, RabbitMQ
- ❖ DevOps & Tools: Docker, CI/CD (GitHub Actions), AI Coding Assistants (Claude, Copilot)
- ❖ Tools & Methodologies: Git, VS Code, Postman, Figma, Agile/Scrum, Neovim, Jira, Confluence, Claude Code
